Company Profile

BAB AL-AFAQ for Energy Supply & Services is a privately owned company based in Qamishli, Syria, established to support oil, gas and energy operators with dependable sourcing, supply and field-services solutions. Our name, meaning “Gateway of the Horizon,” reflects our purpose: connecting operators in Syria to a wide horizon of qualified local and international suppliers, technical expertise and service capability.

We receive tenders and requirements directly from oil and gas operators, government entities and contractors, study the technical scope in detail, and source the right products and services from a vetted network of manufacturers and specialist suppliers — locally and abroad. This allows us to assemble accurate, competitive and technically sound quotations for every requirement we are invited to bid on.

Our growing team combines procurement specialists, technical coordinators and field-services personnel who work closely with clients to understand operational needs and translate them into dependable supply and service outcomes — backed by careful planning, transparent communication and consistent follow-through.

Base: Qamishli, Syria **2 Divisions:** Supply & Services

Global Network: Local & International Sourcing

Vision, Mission & Principles

Clear direction, practical execution and long-term value for energy clients.

Our Vision

To become a trusted local gateway for energy companies seeking reliable supplies, practical services and fast execution in Syria and the region.

Our Mission

Work with a vetted network of local and international manufacturers and specialist suppliers, comparing quality, lead time and price to assemble the most competitive offer.

Honour commitments on price, quality and schedule — building long-term trust with clients, partners and suppliers through transparency in every transaction.

Operating Principles

Follow-up

We keep actions visible, deadlines clear and clients updated.

Quality before shortcuts

We prioritize fit-for-purpose products, proper documents and safe practices.

Technical clarity

We align scope, data sheets, standards and commercial terms before submission

Our Scope of Work

Bab Al-Afaq operates across two complementary divisions, built to cover the full supply and service needs of drilling and production operations in Syria.

GOODS

Supply Division

Sourcing and supply of production & drilling chemicals, mechanical, instrument and electrical items and spares, processing equipment, piping materials, and flare-related goods & services.

SERVICES

Services Division

Field execution of drilling and production services — including support, inspection and testing — delivered by qualified technical personnel.

Supply Chemicals

Production Chemicals

- Asphaltene inhibitor
- Demulsifier
- Defoamer (Antifoam)
- Drag Reducer
- Biocide
- Corrosion Inhibitor
- H₂S Scavenger
- Scale Inhibitor
- Oxygen Scavenger
- Wax Inhibitor
- Pour Point Depressants
- Toluene
- Xylene
- Ethanol
- Methanol
- Monoethanolamine (MEA)
- Diethanolamine (DEA)
- Triethanolamine (TEA)
- Ethylene Glycol (EG)
- Mono Ethylene Glycol (MEG)
- Di Ethylene Glycol (DEG)
- Tri Ethylene Glycol (TEG)

Cementing & Stimulation Chemicals

Cementing

- Anti Foam
- Dispersants
- Fluid Loss Additives
- Gas Migration Additives
- G Class Cement
- Retarders
- Spacers
- Surfactants

Stimulation

- Acid Anti Sludge
- Acid Corrosion Inhibitor
- Acid Gelling Agents
- Biocide
- Buffers
- Clay Control Agent
- Crosslinkers
- Defoamer
- Fluid Loss Control Agent
- Friction Reducer
- Gel Breaker Agent
- H₂S Scavenger
- Iron Control
- Mutual Solvent
- Non-emulsifier
- Scale Inhibitor
- Surfactants

Drilling Fluid Chemicals

Bulk and packaged drilling-fluid additives for wellsite mud systems, performance control and operational reliability.

Drilling Fluid Types & Additives

- | | |
|--------------------------------------|----------------------------------|
| • Aluminum Sulphate | • Oyster Shell (F/M/C) |
| • Antifoam | • Potassium Chloride (KCL) |
| • Barite Powder API | • Potassium Formate |
| • Bentonite Powder API | • Potassium Silicate |
| • Biocide | • Potassium Sulphate |
| • Blacknite (Fury) | • PAC LV |
| • Calcium Bromide | • PAC R |
| • Calcium Carbonate (F/M/C) | • PHPA |
| • Calcium Chloride (Powder & Flakes) | • Polyamine |
| • Caustic | • Quick Seal (F/M/C) |
| • Cellulose Fiber (F/M/C) | • Quick Lime |
| • CMC-HV | • Sodium Bicarbonate |
| • CMC-LV | • Sodium Bromide |
| • Chrome Free Lignosulphonate (CFL) | • Sodium Chloride (Salt) |
| • Citric Acid | • Sodium Chloride PVD (PVD Salt) |
| • Corrosion Inhibitor | • Sodium Formate |
| • Desco | • Sodium Silicate |
| • Drilling Detergent | • Soda Ash |
| • Drill Foam | • Spotting Fluid |
| • Graphite (L)(C)(F) | • Starch (All Grades) |
| • Glycol (MC & HC) | • Sulphonated Asphalt |
| • H ₂ S Scavenger | • Nut Plug (F/M/C) |
| • Hematite | • Xanthan Gum |
| • Lubricant | • Zinc Carbonate |
| • MICA (F/M/C) | • Zinc Oxide |
| • Organophilic Clay | • ROP Enhancer |

Supply Mechanical, instrumentation, electrical and spare parts

Mechanical

- Valves — gate, globe, ball, butterfly, check
- Pumps — centrifugal, gear, diaphragm, screw
- Motors — LV/MV electric, induction, synchronous
- Compressors — centrifugal, gear, diaphragm, screw
- Pipes, fittings, flanges & flanges
- Couplings, bearings, filters & seals
- Gearboxes & rotating equipment spares

Instrumentation

- Pressure, temperature, gauges & flow transmitters
- Control valves & positioners
- Analytical instruments & gas detectors
- Field sensors & signal converters
- Calibration & panel-mounted instruments

Electrical

- Cables & wiring (LV / MV / HV)
- Circuit breakers, switches & panels
- Lighting, junction boxes, glands and accessories
- Transformers & switchgear
- Hazardous-area lighting systems
- Motors, drives & control components

Process & Package Supply

We support client requirements by coordinating technically suitable equipment and packaged solutions, ensuring the offered scope is aligned with datasheets, standards and site conditions.

- Nitrogen generation packages and utility skids
- Heat exchangers, pressure vessels and process modules
- Pumps, motors, piping materials and skid-mounted assemblies
- Project consumables, installation materials and commissioning support items

ZEECO Flare Systems & Services

Combustion and environmental solutions for safe, efficient, and reliable plant operation.

ZEECO®

BAB AL-AFAQ is the
official representative of
ZEECO in Syria.

ZEECO Products

Combustion and environmental solutions listed on Zeeco's Products page.

- 01 Industrial Burners
- 02 Flare Systems
- 03 Thermal Oxidizers
- 04 Vapor Control
- 05 Aftermarket Parts
- 06 Rentals
- 07 Combustion Electronics

ZEECO Services

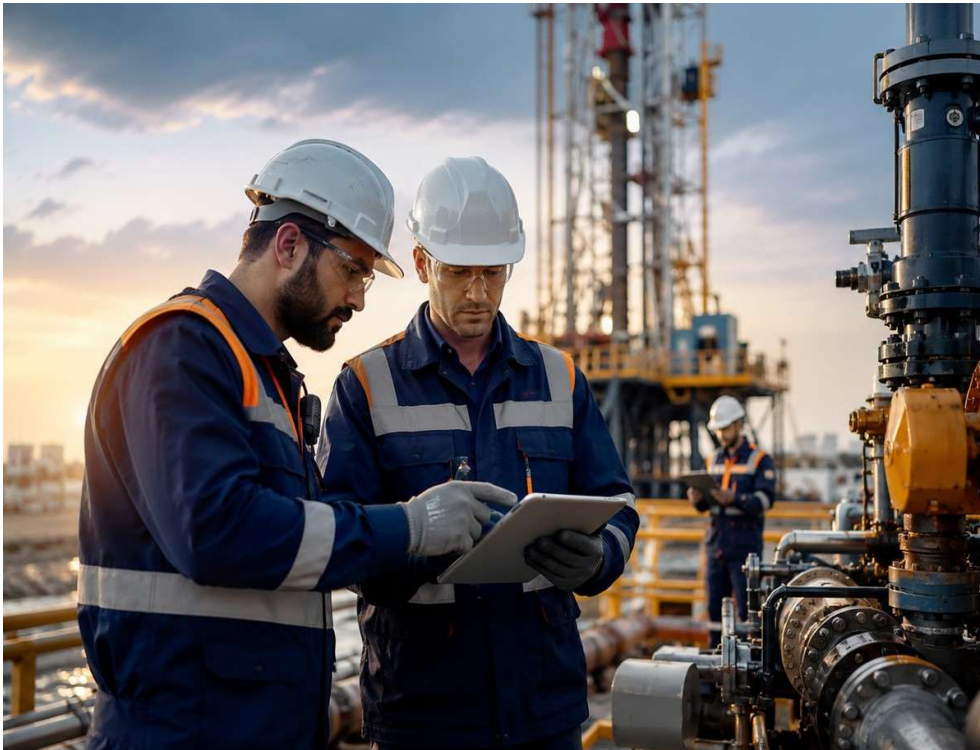

Technical services and field expertise listed on Zeeco's Services page.

- 01 **Global Field Services**
- 02 **Aftermarket Parts**
- 03 **Rental Equipment**
- 04 **Immersive Technologies**
- 05 **Pipeline Services**
- 06 **Aerial Inspections**
- 07 **Virtual Tests & Inspections**

Service Capability

Field support for production and drilling activities, coordinated with safety and operational discipline.

Production & Drilling Services

We support service requirements by coordinating qualified manpower, required tools, consumables and job-specific execution plans.

Safety-first delivery

Scope, personnel, access and site requirements to be aligned before mobilization.

Operations

Production support, troubleshooting, maintenance assistance and routine field activities.

Well Cementing Services Overview

Integrated cementing support for safe, efficient and reliable well construction operations.

Service Scope

- Primary cementing for conductor, surface, intermediate, production and liner strings
- Remedial cementing: squeeze jobs, top-up cementing and plug placement
- Lost circulation support and challenging wells: high temperature, gas migration risk and weak formations

Equipment & Field Execution

- Cementing pumping units, batch / recirculating mixers and bulk handling systems
- Cement silos / bulk tanks, density control systems, HP iron, hoses and manifolds
- Onsite supervision, data monitoring, pressure testing and post-job evaluation

Operational Approach

- Programs are developed around well geometry, casing design and formation conditions
- Focus on displacement efficiency, pumping safety margin, HSE compliance and contingency planning

Laboratory, Simulation & Materials

Engineering-backed slurry design supported by testing, modeling, quality materials and experienced execution.

Laboratory Capability

- Slurry density, rheology, thickening time, free fluid and fluid loss testing
- Compressive strength development, ultrasonic/destructive strength testing and stability checks
- Additive compatibility, performance evaluation, blend verification and troubleshooting

Simulation & Job Modeling

- Slurry placement and displacement efficiency
- Hydrostatic pressure / ECD review and pumping schedule optimization
- Spacer, preflush, contamination risk, temperature profile and annular coverage evaluation

Products & Additives

- API cement classes and special blends; extenders, lightweight additives and weighting agents
- Fluid loss control, retarders, accelerators, dispersants, defoamers and LCM
- Gas migration control, strength enhancers, suspension and high-temperature specialty additives
